LOYAL MOOSE ELECTS OFFICERS

The Loyal order of Moose recently installed in Barbourville, by C. D. Chavis of Corbin, is coming strong and on Monday night they elected the following excellent list of officers to carry on the work of the organization:

John H. Lawson, Past Dictator.
D. C. Clause, Dictator.
F. A. Scent, Vice Dictator.
L. C. Miller, Junior Prelate.
Chas. Owens, Sergeant at Arms.
Geo. Shupe, Inner Guard.
W. M. Jordan, Outer Guard.
James Bullock, Secretary.
F. Moore, Treasurer.
K. F. Davis, Trustee 1 year.
Chas. Fletcher, Trustee 2 years.
R. M. Jarvis, Trustee 3 years.

PINEVILLE BANK ENTERED

While people were enjoying the Carnival Wednesday night, two burglars entered the First State Bank, Pineville. However, they rang the alarm bell on the vault and the bank was quickly surrounded. One burglar, it is claimed, sprang from the roof and got away and the other is thought to have mingled with the crowd when they entered the bank.

The attempt at burglary was unsuccessful. If you own a bank, watch it during carnival times, even if you have to hire an assistant bulldog.

IOWA PARK COMING OIL FIELD OF NORTH TEXAS

Experienced oil men and geologists agree that the Iowa Park field, ten miles west of Wichita Falls, Texas, and about the same distance south of Burkburnett, gives indications of bearing the same or better deep oil sand as that of the famous Burkburnettfield. In fact it is now thought that the Fowler sands of the Burkburnett field extend to and beyond Iowa Park. There has been a profitable shallow production from the Iowa Park field for the past eight years and that production is still holding up as strong as when first brought in. There are three known shallow sands there. At 290 feet the sand produces about five barrels; at 500 feet it is good for from 15 to 30 barrels, and at 770 feet there is another sand producing from 50 barrels to 100 barrels. The oil is of high gravity, selling to the pipe lines at \$2.60 a barrel.

Since the discovery of the Fowler sand in Burkburnett field the pipe lines are coming into the Wichita Falls district and are taking runs from all the shallow fields as well as from the deep wells of the Burkburnett field, so that operations in all these fields have been greatly stimulated, and much deeper drilling is now being done that will probably bring in another gusher field in due time that will rival the great Burkburnett field, and Iowa Park is just now much in the lime light in expectation of the deep pay being reached here.

THE EXPLANATION

Nature placed the growth-promoting "vitamins" in the oil of the cod-fish—this explains why

Scott's Emulsion

is so definite in its help to a child of any age. Latter-day science reveals that the "vitamins" are needful for normal growth. Scott's Emulsion will help any child grow.

It Takes Two Things to Make a Good Oil Company and Be Successful—

OIL LAND AND HONEST MANAGEMENT

Block 30 of the Wichita Valley Lands is the Munger Ranch. It has long been known to hundreds of people in and around Wichita Falls that there is oil on the Munger Ranch. The Munger Well proves this. As shown by the map our shallow well will be drilled offsetting the Munger well. Thirty acres is sufficient to put, at the very least, thirty shallow wells on. It is generally admitted that the Watkins well, within 2 miles of us, is producing 75 barrels of oil daily. This oil sells for \$2.50 per barrel. Thirty wells producing 75 barrels each makes 2,250 barrels per day. If we allow the 50 cents per barrel for expenses and royalty, the Munger Ranch Oil Company will have a net income of \$4,500 per day, or \$135,000 per month. On our capitalization this will enable us to pay a monthly dividend at 225 per cent. These figures are the lowest estimate, and everybody who knows will tell you we can't miss the shallow oil.

We will also drill a deep well—1,850 feet if necessary. We are going to drill a deep well because the trend of the deep oil seems to be through our land, and because geologists and the best informed oil men think there is deep oil also on the Munger Ranch. The Kemp-Munger-Allen Oil Co., which company is backed by some of the wealthiest and most successful men in the Southwest, is drilling a deep well on their holdings, which are within 800 yards of our land. If we get this deep well, Munger Ranch will be a repetition of the Fowler bonanza. Fowler \$100 certificates selling for \$15,000.

You can hardly lose because we are nearly certain of the shallow oil. This alone will more than double your money every month. If we get the deep oil also, every \$100 stockholder will be wealthy. Now is your golden opportunity. It is your duty to grasp it.
